Disclaimer

- This room is an unsafe harbour

- No one from Oracle has previewed this presentation

- No one from Oracle knows what I'm going to say

- No one from Oracle has supplied any of my materials

- This discussion is about a Beta and I am going to be very ... VERY ... careful to show you only what has been demonstrated at OpenWorld so as not to violate my NDA

- But what I am going to emphasize is precisely those things you need to know to move forward with your career

This disclaimer has <u>not</u> been approved by Oracle Legal

Slide Three of Three

- Oracle has changed fundamental constructs untouched since version 6.0

- What you need to pay attention to
  - Container Database (CDB)
  - Root Database (RDB)
  - Pluggable Database (PDB)
  - The DBA role ... I been warning people to stop using it?
  - As things stand today you must learn the SYS_CONTEXT function ... you are going to need it to survive
  - Take nothing for granted in a CDB
  - Throw away tools not certified to 12c
  - If you are a DBA with 20+ years experience
    ... you MUST read the docs: Not doing so is not an option
    ... unless you want a career change

The balance of this presentation will be unscripted and will not be available in any published form until after the product is released.
