
Oracle Multimedia

Managing Medical and Other Specialty Data

presentation for:

Oracle OpenWorld

September 21 – 25, 2008

Daniel A. Morgan

Who Oracle thinks I am?

- Daniel Morgan – damorgan@u.washington.edu
- Oracle Ace Director 
- University of Washington 
 - Wrote UW Oracle curricula
 - Primary program instructor - 8 years
- The Morgan behind [Morgan's Library](http://www.psoug.org/library.html) on the web
 - www.psoug.org/library.html
- Education Chair: PSOUG 
- Member: UKOUG 
- Frequent speaker – OOW and user group events
- Beta tester: 10g, 11g, and TimesTen
- Oracle since version 6

Who I really am

"AUSTRALIA'S MOVIE MAKING BREAKTHROUGH" -- THE ENTERTAINER

LLOYD KAUFMAN & MICHAEL HERZ PRESENT A TROMA TEAM RELEASE

DENNIS HOPPER MAD DOG MORGAN

A BITCH OF AN ACTION FILM!

"An excellent early example of the Australian revival, this is a pacy, violent bushranger saga..." -- Time Out Film Guide

Dennis Hopper ("Blue Velvet," "Easy Rider") plays Dan Morgan, the infamous real-life 1800's outlaw. Morgan is an Irish immigrant working as a gold digger in the treacherous Australian brush. When his comrades reject him, Morgan resorts to stealing horses and is caught and sentenced to jail. After years of abuse and brutality he is released and falls back into his bandit ways. Soon Morgan is wanted at any price, dead or alive, setting the backdrop for this intense and riveting thriller!

"Mad Dog Morgan" was a 1977 theatrical hit world-wide and was nominated by the Australian Film Institute Award BEST DIRECTOR (Philippe Mora) and BEST ACTOR IN A SUPPORTING ROLE (Bill Hunter).

LLOYD KAUFMAN & MICHAEL HERZ PRESENT A TROMA TEAM RELEASE OF A PHILIPPE MORA FILM
"MAD DOG MORGAN" STARRING DENNIS HOPPER JACK THOMPSON DAVID GULPILL FRANK THRING
DIRECTOR OF PHOTOGRAPHY MIKE MULLIVY BASED ON THE BOOK "MORGAN" BY MARGARET CARRIEGIE

Microsoft Excel fails math test

Employee blogger wrote that some multiplication results incorrect

AP Associated Press
Updated: 10:29 a.m. PT Sept 28, 2007

SEATTLE - [Microsoft](#) Corp.'s Excel 2007 spreadsheet program is going to have to relearn part of its multiplication table.

In a [blog](#) post, Microsoft employee David Gainer said that when computer users tried to get Excel 2007 to multiply some pairs of numbers and the result was 65,535, Excel would incorrectly display 100,000 as the answer.

Gainer said Excel makes mistakes multiplying 77.1 by 850, 10.2 by 6,425 and 20.4 by 3,212.5, but the program appears to be able to handle 16,383.75 times 4.

What is Oracle Multimedia?

- New name
 - Used to be Intermedia
- Enables the Oracle Database to store, manage, manipulate, and retrieve:
 - audio
 - documents
 - images
 - video
- Based on object-relational data types
 - OrdAudio
 - OrdDoc
 - OrdImage
 - OrdVideo

Oracle Multimedia Metadata?

- Media metadata is stored in the database under Oracle Multimedia control. Oracle Multimedia manages metadata for all the media types and may automatically extract it for audio, image, and video. This metadata includes:
 - source type
 - source location
 - source name
 - update timestamp
 - description
 - MIME type
 - encoding type
 - number of channels
 - frame width & height
 - frame resolution
 - frame rate
 - number of colors
 - extracted XML such as director or producer of a movie
 - sampling rate
 - sample size
 - compression type
 - play time
 - height & width
 - image content length
 - image content format
 - compression format
 - compression type
 - play time
 - number of frames
 - bit rate

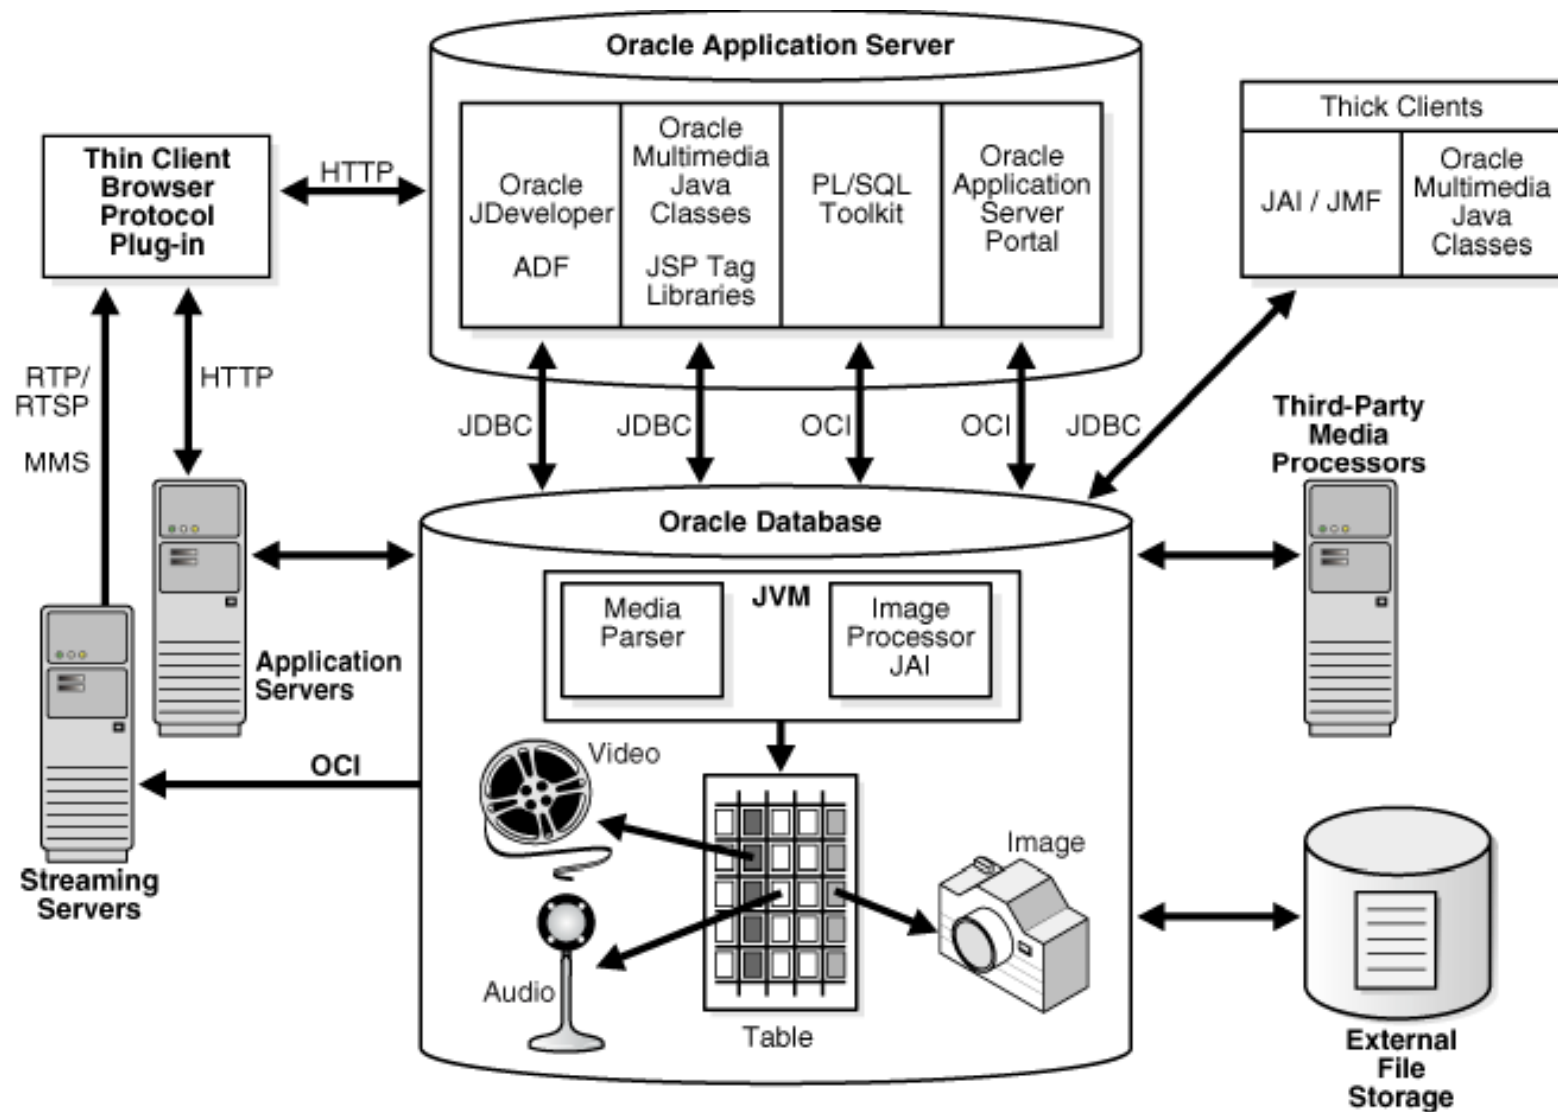

Integrated with

- SQL
- PL/SQL
- OCI
- Streaming Content
 - RealNetworks Streaming Servers
 - Microsoft Windows Media Services
- Web Technology Support
 - Oracle Multimedia Servlets and JSP Java API
 - Oracle Application Server Portal
 - Oracle Application Development Framework (ADF)
- SQL*Loader

Oracle Multimedia Architecture

Multimedia Storage

- Internally, in the database, as BLOBs
 - Up to 8GB - 128TB depending on block size
- Externally, outside the database
 - Using a BFILE pointer

OrdAudio

- OrdAudio integrates the storage, retrieval, and management of digitized audio data
- Audio may be produced by an audio recorder, an audio source such as a microphone, digitized audio, other specialized audio recording devices, or even by program algorithms. Audio recording devices take an analog or continuous signal, such as the sound picked up by a microphone or sound recorded on magnetic media, and convert it into digital values with specific audio characteristics such as format, encoding type, number of channels, sampling rate, sample size, compression type, and audio duration.

Audio File Formats

- Supported Formats
 - .MPG
 - .MPEG
 - .MP3
 - .MP4
 - RealNetworks
 - .WAV
 - and many more

OrdAudio Datatype

```
SQL> desc ordaudio
```

Name	Type
-----	-----
DESCRIPTION	VARCHAR2 (4000)
SOURCE	ORDSYS.ORDSOURCE
FORMAT	VARCHAR2 (31)
MIMETYPE	VARCHAR2 (4000)
COMMENTS	CLOB
ENCODING	VARCHAR2 (256)
NUMBEROFCHANNELS	NUMBER (38)
SAMPLINGRATE	NUMBER (38)
SAMPLESIZE	NUMBER (38)
COMPRESSIONTYPE	VARCHAR2 (4000)
AUDIODURATION	NUMBER (38)

OrdDoc

- OrdDoc integrates the storage, retrieval, and management of heterogeneous media data
- The OrdDoc type can store any heterogeneous media data including audio, image, and video data in a database column. Instead of having separate columns for audio, image, text, and video objects, you can use one column of OrdDoc objects to represent all types of multimedia.

OrdDoc Datatype

```
SQL> desc sys.orddoc
```

Name	Type
-----	-----
SOURCE	ORDSYS.ORDSOURCE
FORMAT	VARCHAR2(80)
MIMETYPE	VARCHAR2(80)
CONTENTLENGTH	NUMBER(38)
COMMENTS	CLOB

OrdImage

- OrdImage integrates the storage, retrieval, and management of digitized images
- OrdImage supports two-dimensional, static, digitized raster images stored as binary representations of real-world objects or scenes. Images may be produced by a document or photograph scanner, a video source such as a digital camera or VCR connected to a video digitizer or frame grabber, other specialized image capture devices, or even by program algorithms. Capture devices take an analog or continuous signal such as the light that falls onto the film in a camera, and convert it into digital values on a two-dimensional grid of data points known as pixels. Devices involved in the capture and display of images are under application control.

Image File Formats

- Supported Image Formats
 - .BMP (bitmap)
 - .DCM (DICOM)
 - .GIF
 - .JPG & .JPEG
 - .PCT (pict)
 - .TIFF
 - and many more

OrdImage Datatype

```
SQL> desc ordimage
```

Name	Type
-----	-----
SOURCE	ORDSYS.ORDSOURCE
HEIGHT	NUMBER(38)
WIDTH	NUMBER(38)
CONTENTLENGTH	NUMBER(38)
FILEFORMAT	VARCHAR2(4000)
CONTENTFORMAT	VARCHAR2(4000)
COMPRESSIONFORMAT	VARCHAR2(4000)
MIMETYPE	VARCHAR2(4000)

OrdVideo

- OrdVideo integrates the storage, retrieval, and management of digitized video data
- Video may be produced by a video recorder or camera, digitized animation video, other specialized video recording devices, or even by program algorithms. Some video recording devices take an analog or continuous signal, such as the video picked up by a video camera or video recorded on magnetic media, and convert it into digital values with specific video characteristics such as format, encoding type, frame rate, frame size (width and height), frame resolution, video length, compression type, number of colors, and bit rate.

Video File Formats

- Supported Video Formats
 - .MOV (Apple QuickTime)
 - .AVI (Microsoft Video)
 - .RM (RealNetworks)
 - .MPG
 - .MP4
 - and many more

OrdVideo Datatype

```
SQL> desc ordvideo
```
